Correction: Influence of N-heteroaromatic $\pi-\pi$ stacking on supramolecular assembly and coordination geometry; effect of a single-atom change in the ligand

Hamid Reza Khavasi* and Bahareh Mir Mohammad Sadegh

Correction for 'Influence of N-heteroaromatic $\pi-\pi$ stacking on supramolecular assembly and coordination geometry; effect of a single-atom change in the ligand' by Hamid Reza Khavasi et al., Dalton Trans., 2015, 44, 5488–5502.

In the above manuscript, Scheme 4 should be replaced by the scheme below, with color ribbons for different $\pi-\pi$ interactions and definitions for the A, B, and P symbols. The color of the background behind each row in Table 3 and also the color coding in Fig. 8 are chosen according to this scheme for better clarity. Also, symbols A, B and P are defined according to this scheme. These symbols are used in the text for the $\pi-\pi$ interactions between the different rings.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
