# Correction: Chemical fixation of $CO_2$ into cyclic carbonates by azo-containing Schiff base metal complexes

Mesut İkiz,[a] Esin İspir,*[a] Emine Aytar,[b] Mahmut Ulusoy,[b] Şemistan Karabuğa,[a] Mehmet Aslantaş[c] and Ömer Çelik[d]

Correction for 'Chemical fixation of $CO_2$ into cyclic carbonates by azo-containing Schiff base metal complexes' by Mesut İkiz *et al.*, *New J. Chem.*, 2015, DOI: 10.1039/c5nj00571j.

The product shown in Table 5, entry 3 is incorrect. The correct Table 5 is shown below.

Table 5 The comparison of various epoxides to the corresponding cyclic carbonates under the same catalytic conditions with the $Zn(L^1)_2$ (**4**) catalyst

| Entry[b] | Product | Yield[a] (%) | Selectivity[a] (%) |
|---|---|---|---|
| 1 |  | 3.3 | 99.0 |
| 2 |  | 62.1 | 98.2 |
| 3 |  | 4.2 | 73.2 |
| 4 |  | 2.4 | 95.8 |
| 5 |  | 0.6 | 72.5 |

[a] Yield and selectivity of epichlorohydrin to the corresponding epichlorohydrin carbonates were determined by GC. [b] Reaction conditions: epoxides ($4.5 \times 10^{-2}$ mol), catalyst: $Zn(L^1)_2$ ($4.5 \times 10^{-5}$ mol), DMAP ($9 \times 10^{-5}$ mol), 100 °C, 1.6 MPa and 2 h.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
