Correction for 'Combining microfluidics and FT-IR spectroscopy: towards spatially resolved information on chemical processes' by Adeline Perro *et al.*, *React. Chem. Eng.*, 2016, DOI: 10.1039/c6re00127k.

The authors wish to point out that an incorrect copyright statement was used in the caption of Fig. 5 (II). The corrected version of Fig. 5 caption is as follows:

**Fig. 5 (I)** Schematic view of the procedure of seeding live cells on an ATR device. FTIR images generated using the 1535  $\text{cm}^{-1}$  band (adapted from ref. 54. Copyright 2013 RSC publications). **(II) Left:** Schematic view of the microfluidic open channel device. The living cells are maintained in a thin film of fluid and nutrients are supplied from the media channel below the membrane. **Right:** Stability of the IR measurements of cells over a week (adapted with permission from ref. 57 (K. Loutharback, L. Chen and H.-Y. N. Holman, *Anal. Chem.*, 2015, 87, 4601). Copyright 2015 American Chemical Society).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
