Correction: Aromaticity gain increases the inherent association strengths of multipoint hydrogen-bonded arrays

Chia-Hua Wu, Yu Zhang, Krista van Rickley and Judy I. Wu*

Correction for 'Aromaticity gain increases the inherent association strengths of multipoint hydrogen-bonded arrays' by Chia-Hua Wu *et al.*, *Chem. Commun.*, 2018, **54**, 3512–3515.

The name "Lüning" has been systematically misspelled in several locations:

(1) Page 3, right, line 2.

(2) Page 3, right, line 13.

(3) Page 3, Fig. 4b and caption (an updated version is shown below).

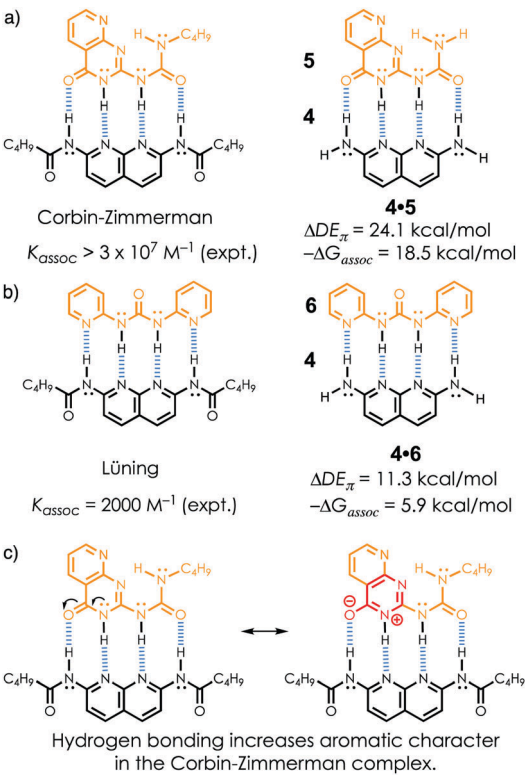

Fig. 4 Experimental K_{assoc} values (in chloroform) for the ADDA–DAAD modules of (a) Corbin–Zimmerman and (b) Lüning; see also model arrays, **4**·**5** and **4**·**6**, on right. Note π-conjugation pattern difference highlighted in orange. (c) Resonance form showing increased aromatic character in the Corbin–Zimmerman module upon hydrogen bonding.

University of Houston, Houston, TX, USA. E-mail: jiwu@central.uh.edu

(4) Page 4, ref. 29.
Ref. 29 also refers to an incorrect journal. The revised corrected form of ref. 29 is cited as ref. 1 below.
The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
