Expression of concern: ZnO nanoparticles affect intestinal function in an *in vitro* model

Philippa Hughes

DOI: 10.1039/c8fo90012d

Expression of concern for 'ZnO nanoparticles affect intestinal function in an *in vitro* model' by Fabiola Moreno-Olivas *et al., Food Funct.,* 2018, **9**, 1475–1491.

The following article 'ZnO nanoparticles affect intestinal function in an *in vitro* model' by Fabiola Moreno-Olivas, Elad Tako and Gretchen J. Mahler has been published in *Food & Function*. The article reports that the amount of zinc present in canned food is above the recommended dietary allowance.

The Royal Society of Chemistry has been contacted by the authors to inform us that the data within the paper is not reliable. *Food & Function* is publishing this expression of concern to alert readers. An investigation is underway, and this notice will be updated when a final outcome is reached.
