 Correction for 'Conformationally restricted benzothienoazepine respiratory syncytial virus inhibitors: their synthesis, structural analysis and biological activities' by Euan A. F. Fordyce *et al.*, *Med. Chem. Commun.*, 2018, DOI: 10.1039/c8md00033f.

The authors regret that the information in note 17 in the References section of the manuscript gives an incorrect ratio of the isomers. The correct information is as follows:

17. The major impurity present in the mixture (29% isolated yield) was the corresponding propenyl thiophene **24**, present as a 4 : 1 mixture of *trans* : *cis* isomers, which presumably form *via* elimination of triphenylphosphine oxide from the intermediate alkyloxytriphenylphosphonium species.

In addition, the wording in the Acknowledgements should be amended as follows:

The authors would like to thank Dr Kaz Ito (Pulmocide Ltd.) and Heather Allen (Pulmocide Ltd.) for the provision of the biological screening data for compounds **8a**, **14** and **20**.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
