Correction for 'Boosting the solar water oxidation performance of a BiVO₄ photoanode by crystallographic orientation control' by Hyun Soo Han *et al.*, *Energy Environ. Sci.*, 2018, **11**, 1299–1306.

The authors regret that citations were omitted from the caption of Fig. 4, parts (c) and (d). The caption of Fig. 4 is updated as given below:

Fig. 4 Surface modification of a p-BVO photoanode. (a) Top-view SEM image and (b) AFM topography and height profiles of surface-etched p-BVO. The striped pattern had a span of ~70 nm and pitches of ~30 nm. *J-V* curves of best-performing BVO-based photoanodes (c) without electrocatalysts^{1–4} and (d) with electrocatalysts reported to date.^{1,4–6} The p-BVO photoanode described herein outperformed all previously reported analogs, showing $J_{\text{ph}} \approx 6.1 \text{ mA cm}^{-2}$ at 1.23 V_{RHE} after Co-Pi electrocatalyst deposition (AM1.5G illumination, 100 mW cm⁻²).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
