Expression of concern for 'A hypoxia-dissociable siRNA nanoplatform for synergistically enhanced chemo-radiotherapy of glioblastoma' by Yandong Xie, *et al.*, *Biomater. Sci.*, 2022, **10**, 6791–6803, <https://doi.org/10.1039/D2BM01145J>.

Biomaterials Science is publishing this expression of concern in order to alert readers that concerns have been raised over the integrity of the data published in this article.

An independent expert has assessed the **Fig. 5** and is concerned the authors have not provided an accurate representation of the experiments that were conducted.

An Expression of Concern will continue to be associated with the article until our investigation is concluded and we receive conclusive evidence regarding the reliability of the reported data.

Signed: Maria Southall
