Correction for '*Lactobacillus fermentum* F40-4 ameliorates hyperuricemia by modulating the gut microbiota and alleviating inflammation in mice' by Jiayuan Cao *et al.*, *Food Funct.*, 2023, 14, 3259–3268, <https://doi.org/10.1039/D2FO03701G>.

The authors regret their oversight in omitting the attribute for the panels labelled CON, MOD and ADC in Fig. 3 to their original sources, previous publications by the authors in *Frontiers in Immunology* and *Frontiers in Nutrition*, cited as ref. 17 and 26 in the original article, which represent the same batch of animal experiments. The correct figure legend is given here.

**Fig. 3** H&E staining of mice organs. (A) Hepatic sections (200× magnification). (B) Renal sections (200× magnification). (C) Colonic sections (100× magnification). Panels labelled CON, MOD and ADC were reproduced from J. Cao *et al.*, *Front. Immunol.*, 2022, 13, 940228 and J. Cao *et al.*, *Front. Nutr.*, 2022, 9, 954545.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
