Correction: An *in situ* growth route towards anti-perovskite Ni_3InN nanoparticles embedded within amorphous silicon nitride

Shotaro Tada, [ad] Sakurako Takazawa,[a] Norifumi Asakuma, [a] Maxime Cheype,[b] Sawao Honda, [a] Ravi Kumar, [c] Samuel Bernard [b] and Yuji Iwamoto [*a]

Correction for 'An *in situ* growth route towards anti-perovskite Ni_3InN nanoparticles embedded within amorphous silicon nitride' by Shotaro Tada *et al.*, *J. Mater. Chem. A*, 2024, 12, 3689–3699, https://doi.org/10.1039/D3TA06212K.

The authors apologise for an error in Fig. 6. The graphs for Fig. 6b and c were incorrectly swapped so that they appeared in the wrong position. The corrected figure is shown here.

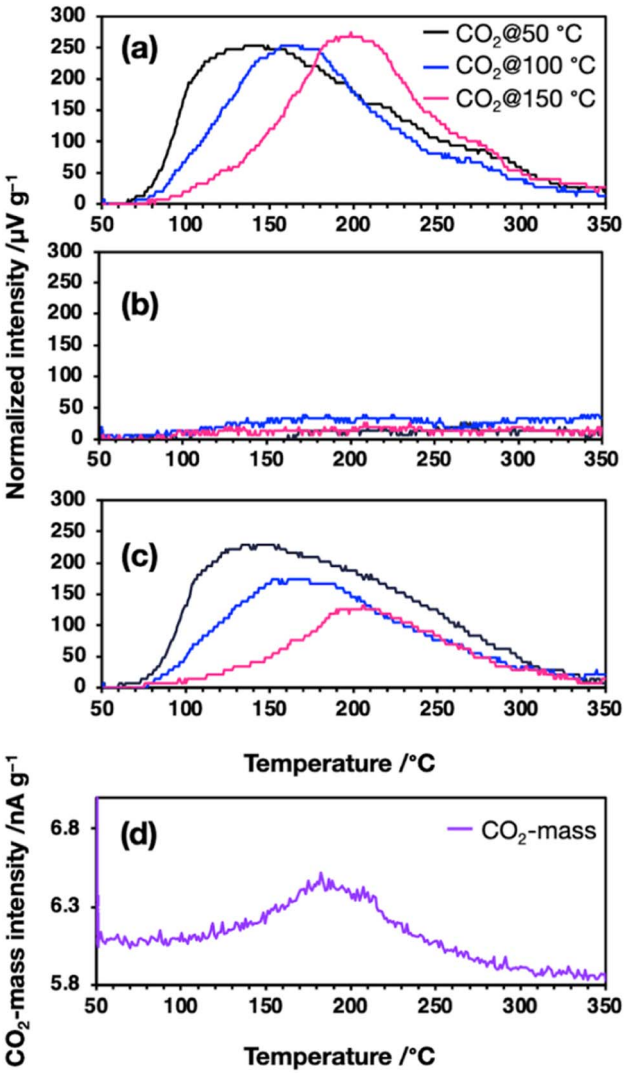

Fig. 6 CO_2-TPD spectra under flowing He recorded for Ni_3InN/a-SiN nanocomposites: normalized TCD curves of (a) the $Ni_{0.05}In_{0.1}$-DRZ600 sample, (b) bulk Ni_3InN obtained by ammonolysis of an oxide precursor and (c) microporous amorphous SiN derived from $In_{0.1}$-DRZ600 synthesized by pyrolysis under NH_3 at 600 °C and (d) CO_2-mass spectra of the $Ni_{0.05}In_{0.1}$-DRZ600 sample recorded after CO_2 treatment at 150 °C.

In addition, the authors regret a mistake in the text of the manuscript. In the left column on page 3696 the section that begins "*In contrast, the CO_2-TPD spectra of the bulk Ni_3InN sample (Fig. 6b)…*" and ends "*…which decreases in intensity with increasing T_{CO_2}, indicating CO_2 physisorption behavior*." should be as shown below:

"In contrast, the CO_2-TPD spectra of the bulk Ni_3InN sample (Fig. 6b) exhibits no pronounced peak under the same measurement conditions. Interestingly, the CO_2 desorption peak intensity of the **$Ni_{0.05}In_{0.1}$-DRZ600** sample increases consistently with increasing T_{CO_2}, suggesting the CO_2 chemisorption behavior (Fig. 6a). In contrast, the **$In_{0.1}$-DRZ600** sample exhibits a broad CO_2 desorption curve which decreases in intensity with increasing T_{CO_2}, indicating CO_2 physisorption behavior (Fig. 6c)".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
