Correction for 'A pH-driven, reconfigurable DNA nanotriangle' by Wenxing Wang *et al.*, *Chem. Commun.*, 2009, 824–826.

The authors regret that the DNA sequences for strands M and C are misspelt in Table 1 of the original article. A revised version of Table 1, with the correct sequences for strands M and C, is presented herein. The sequence of strand F remains the same and the results are unaffected.

Table 1 The DNAs and their sequences used in this study. Three unique sequence domains of DNA M are shown in different colors. F contains two unique domains, linked together *via* a three base AAA linker. Three mismatches (highlighted in red) are engineered to the sequence in C to tune the reversibility of the structural reconfiguration

F	5'-Rhodamine Green-TTC CGT GTA AGA GCG ACC GT AAA CAA CCY GGA ATG CTT CGG AT-Dabsyl-3'
M	5'-ACG GTC GCT CTT ACA CGG AAC CCC AAT CCC CAA TCC CCA ATC CCC ATC CGA AGC ATT CCA GGT TG-3'
C	5'-GTG GAT TGG GGA TTT GGG ATT GTG G-3'

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
