Correction for 'Continuous flow oxidation of HMF using a supported AuPd-alloy' by Dominik Neukum
et al., *Catal. Sci. Technol.*, 2024, <https://doi.org/10.1039/d3cy01722b>.rsc.li/catalysis

The authors regret that there was an error with the LHSV unit in certain positions in the original article. In all instances, the LHSV unit should be h^{-1} . The conclusions, calculations and comparisons in the manuscript were based on the correct unit (h^{-1}), therefore the results remain unaltered.

A list of positions where the LHSV unit has to be corrected is as follows:

- Caption of Fig. 3: "... (LHSV: 7.7 h^{-1}) ... (LHSV: 5 h^{-1}) ... (LHSV: 1.9 h^{-1} ; ..."
- Caption of Fig. 4: "... LHSV: 5 h^{-1} ."
- Caption of Fig. 5: "... (a) ... LHSV: 5 h^{-1} and (b) ... LHSV: 3.4 h^{-1} ."
- Caption of Fig. 6: "... LHSV: 31.4 h^{-1} ."
- Main text on Page 6: "... and a LHSV of 31.4 h^{-1} corresponds..."; "... LHSV: 19.6 h^{-1} , to assess..."; "... (0.1 M HMF, 6 eq. Na_2CO_3 , 100 °C, 67 ± 5 bar, LHSV: 31.4 h^{-1} , 6 h time on stream)..."
- Caption of Fig. 7: "... LHSV: 19.6 h^{-1} ."
- Table 3, heading of fourth column: "LHSV/ h^{-1} "
- Caption of Fig. 8: "... LHSV: 19.6 h^{-1} ."
- Main text on Page 7: "... LHSV: 19.6 h^{-1} was conducted..."

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
