Correction: Biohybrid plants with electronic roots via *in vivo* polymerization of conjugated oligomers

Daniela Parker,^a Yohann Daguerre,^b Gwennaël Dufil,^a Daniele Mantione,^c Eduardo Solano,^d Eric Cloutet,^c Georges Hadzioannou,^c Torgny Näsholm,^b Magnus Berggren,^{ae} Eleni Pavlopoulou^f and Eleni Stavrinidou^{*abe}

Correction for 'Biohybrid plants with electronic roots via *in vivo* polymerization of conjugated oligomers' by Daniela Parker et al., *Mater. Horiz.*, 2021, **8**, 3295–3305, DOI: 10.1039/D1MH01423D.

The authors regret that the values denoted on the y-axis of Fig. 4D in the original article are incorrect. A corrected version of Fig. 4 is shown below.

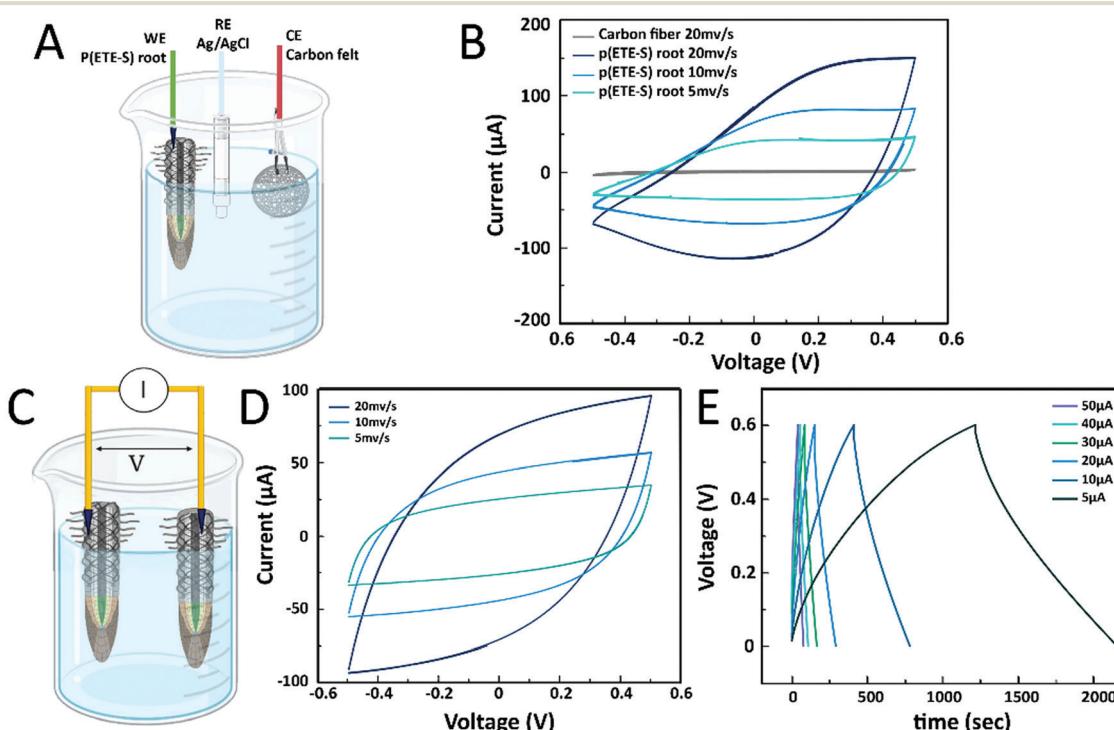

Fig. 4 Electrochemical properties of p(ETE-S) root and root-supercapacitor. (A) Schematic of the 3-electrode set-up used for the cyclic voltammetry of the p(ETE-S) root (created with BioRender.com). (B) Typical cyclic voltammogram of the p(ETE-S) root at 5, 10 and 20 mV s^{-1} scan rates. (C) p(ETE-S) root-supercapacitor schematic (created with BioRender.com). (D) Cycling voltammogram of the root-supercapacitor at scan rates of 5, 10 and 20 mV s^{-1} . (E) Galvanostatic charge–discharge curves at applied currents of 5, 10, 20, 30, 40, and 50 μA .
