Scientists trawling through the thousands of research papers published every month must wish their computer could do the job for them. This could soon be a reality thanks to **Project Prospect**, an initiative developed by RSC Publishing together with academic partners. Readers can click on named compounds and scientific concepts in an electronic journal article to download structures, understand topics, or link through to electronic databases. Powerful functionality instantly helps researchers to find, understand and share (bio)chemical knowledge with each other quicker than ever before. See the science in journal articles *come alive*: visit the **Project Prospect** website for FAQs, examples, contact information and latest news.
