The Definitive Point of Reference

Specialist Periodical Reports from RSC Publishing

Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research. Compiled by teams of leading authorities in the relevant subject areas, the series creates a unique service for the active research chemist, with regular, in-depth accounts of progress in particular fields of chemistry. Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis.

Photochemistry, edited by Angelo Albini (University of Pavia, Italy), reviews photo-induced processes that have relevance to the wide-ranging academic and commercial disciplines in chemistry, physics, biology and technology. In order to provide easy access to this vast and varied literature, **Photochemistry** comprises sections sub-divided by chromophore and reaction type, and also a comprehensive section on polymer photochemistry. Throughout emphasis is placed on useful applications of photochemistry.

Each volume in this impressive series comprises sections concerned with photophysical processes in condensed phases, organic aspects which are sub-divided by chromophore type, polymer photochemistry, and photochemical aspects of solar energy conversion.

Hardback | 406 pages | ISBN 9780854044559 | 2009 | £299.95

Now available electronically - chapters from volumes published 1998 onwards are now available online, fully searchable by keyword, on a pay-to-view basis. Contents pages can be viewed free of charge. Full electronic access is available after purchasing the print edition.
