Correction for 'Miniaturized, multiplexed readout of droplet-based microfluidic assays using time-domain modulation' by Melaku Muluneh *et al.*, *Lab Chip*, 2014, DOI: 10.1039/c4lc00819g.

In the subsection entitled "Mask design" in the "Methods" section of this manuscript, it was stated that a  $105 \times 39$  array was used to generate the pseudorandom sequence. However, this is incorrect. The  $105 \times 4$  mask pattern was a subsection of a  $151 \times 217$  pseudorandom array of degree  $M = 15$ .

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
