Correction for 'Investigation of the local environment of iodate in hydroxyapatite by combination of X-ray absorption spectroscopy and DFT modeling' by Danielle Laurencin *et al.*, *RSC Adv.*, 2014, 4, 14700–14707.

There is a typo in the introduction. This error is in the half-life of iodine-129, which is given as $\sim 1.6 \times 10^6$ years instead of $\sim 16 \times 10^6$ years.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
