 Correction for 'Theoretical study and design of multifunctional phosphorescent platinum(II) complexes containing triarylboron moieties for efficient OLED emitters' by Yong Wu *et al.*, *Phys. Chem. Chem. Phys.*, 2015, DOI: 10.1039/c4cp04919e.

The authors regret that some values of the transition dipole moments, $\mu(S_n)$, in Table 6 of the article are incorrect. The revised version of Table 6 is as shown below. The corrections of $\mu(S_n)$ have no effect on the other calculations, discussions and conclusions.

Table 6 Transition dipole moments $\mu(S_n)$ [Debye] for S_0-S_n transitions, singlet-triplet splitting energies $\Delta E(S_n-T_1)$ [eV] and the SOC matrix elements $\langle T_1 | H_{SOC} | S_n \rangle$ [cm^{-1}] of **1–6** at their respective T_1 optimized geometries obtained from SOC-TD-B3LYP + COSMO calculations in CH_2Cl_2 solution
