Correction for 'Influence of N-heteroaromatic π - π stacking on supramolecular assembly and coordination geometry; effect of a single-atom change in the ligand' by Hamid Reza Khavasi *et al.*, *Dalton Trans.*, 2015, **44**, 5488–5502.

In the above manuscript, Scheme 4 should be replaced by the scheme below, with color ribbons for different π - π interactions and definitions for the A, B, and P symbols. The color of the background behind each row in Table 3 and also the color coding in Fig. 8 are chosen according to this scheme for better clarity. Also, symbols A, B and P are defined according to this scheme. These symbols are used in the text for the π - π interactions between the different rings.

Scheme 4
