## Correction: Influences on and patterns in total gaseous mercury (TGM) at Harwell, England

J. Kentisbeer,<sup>\*a</sup> S. R. Leeson,<sup>a</sup> T. Clark,<sup>b</sup> H. M. Malcolm<sup>a</sup> and J. N. Cape<sup>a</sup>

Correction for 'Influences on and patterns in total gaseous mercury (TGM) at Harwell, England' by J. Kentisbeer et al., *Environ. Sci.: Processes Impacts*, 2015, DOI: 10.1039/c4em00652f.

There is an error in the following sentence in the article abstract: "This is comparable to other northern hemisphere studies, but on average 0.5 ng m<sup>-3</sup> higher than at its sister monitoring station at Auchencorth Moss, Scotland, but 14% lower than that found in a similar study at the same location of 1.68 ng m<sup>-3</sup> in 1995/6".

The corrected sentence should read: "This is comparable to other northern hemisphere studies, but on average 0.05 ng m<sup>-3</sup> higher than at its sister monitoring station at Auchencorth Moss, Scotland, but 14% lower than that found in a similar study at the same location of 1.68 ng m<sup>-3</sup> in 1995/6".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
