Correction for 'CHEM21 selection guide of classical- and less classical-solvents' by Denis Prat, *et al.*, *Green Chem.*, 2015, DOI: 10.1039/c5gc01008j.

The authors wish to highlight two errors in the paper:

(1) The Flash Point limit in GHS between H225 and H226 is 23 °C and not 24 °C. As a result, the basic safety score for solvents with a flash point of 23 to 60 °C is 3, and that for solvents with a flash point of 0 to 22 °C is 4 (Table 2). This affects the safety score of pyridine (Table 7), which is 3 and not 4.

(2) The health score of DME is 9 and not 10 (Table 7).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
