Correction: Dithiolopyrrolones: biosynthesis, synthesis, and activity of a unique class of disulfide-containing antibiotics

Bo Li,*[a] Walter J. Wever,[b] Christopher T. Walsh[c] and Albert A. Bowers*[b]

Correction for 'Dithiolopyrrolones: biosynthesis, synthesis, and activity of a unique class of disulfide-containing antibiotics' by Bo Li *et al.*, *Nat. Prod. Rep.*, 2014, **31**, 905–923.

There were several errors in the structures of thiomarinols as depicted in Fig. 1 of the review: the length of the fatty acyl chain was misannotated, as was the oxidation state at C-4 of Thiomarinol D. The stereochemistry at C-4, which was rigorously proven by H.

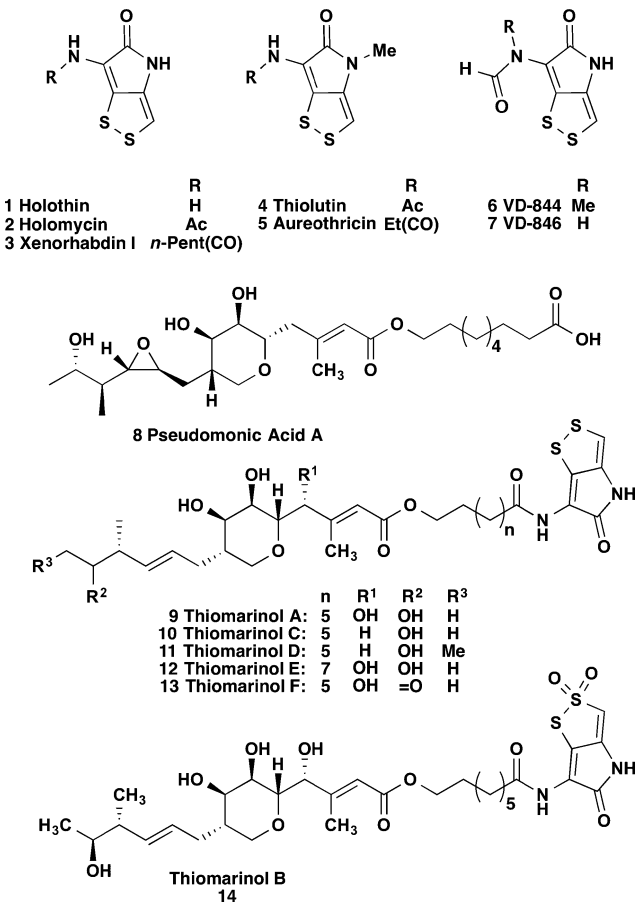

Fig. 1 Structures of isolated dithiolopyrrolones.

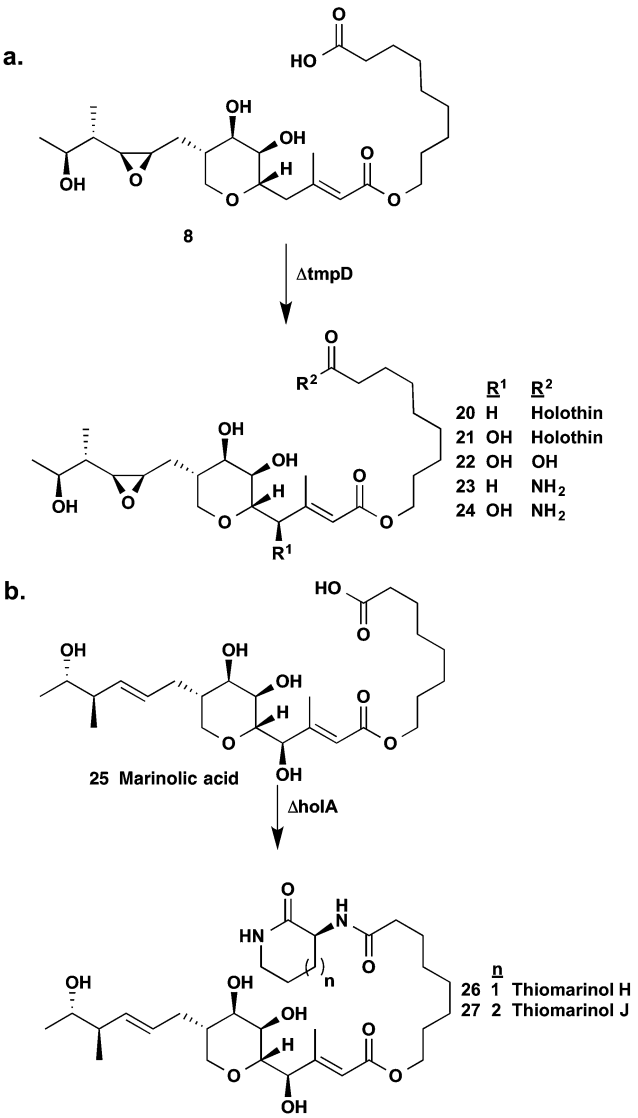
Shiozawa and S. Takahashi, *J. Antibiotics*, 1994, **47**, 851–853, was not included. In Scheme 1, the length of the fatty acyl chain in thiomarinol H and J was also misannotated. These errors have been rectified in the revised figures below.



Scheme 1 Mutasynthetic preparation of thiomarinol derivatives.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
