 Correction for '1D chains, 2D networks and 3D interdigitated frameworks of isoorotic acid or 4,4'-bipyridyl and isoorotic acid: syntheses, structures, and sorption properties' by Ritesh Haldar *et al.*, *Inorg. Chem. Front.*, 2015, **2**, 278–289.

The authors regret that, in the above paper, the ligand named as 2,4-dihydroxypyrimidine-5-carboxylic acid ( $H_3iso^1$ ) (compound 4) should read 2,6-dihydroxypyrimidine-4-carboxylic acid. The structure given in Fig. 6 in the paper is incorrect, and should be modified as given below.

**Fig. 6** (a) View of the coordination environment of Cu(II) in compound  $\{[Cu(Hiso^1)(4,4'-bipy)(H_2O)]\}_n$  (**4**); (b) 1D chain of  $[Cu(Hiso^1)]_n$  formed by a syn-anti carboxylate bridging; (c) view of the 2D sheet; (d) stacking of the 2D sheet along the *b*-axis showing the stairs like shape of a 2D layer; (e) surface added view along the *b*-axis showing 1D supramolecular channels occupied by guest water molecules. ( $H_3iso^1$  = 2,6-dihydroxypyrimidine-4-carboxylic acid; Cyan: Cu(II), grey: C, red: O, blue: N, and green: guest water molecules).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
