Correction for 'Magnetic $g-C_3N_4/NiFe_2O_4$ hybrids with enhanced photocatalytic activity' by Haiyan Ji *et al.*, *RSC Adv.*, 2015, **5**, 57960–57967.

The authors regret that the version of eqn (5) shown in the original article contains errors in its presentation. The correct version of eqn (5) is shown below.

$$H_2O_2 + e^- \rightarrow 'OH + OH^-$$
 (5)

In the **Results and discussion** section of the original manuscript, in the subsection *Photocatalytic mechanism discussions*, the sentence beginning "On the other hand, the CB value..." also included a formatting error. The corrected sentence is shown below. "On the other hand, the CB value of NiFe₂O₄ (0.35 eV) is less negative than $E^0(O_2/O_2^-)$ (-0.046 eV vs. NHE), ⁴⁴ so O₂ would not be reduced by electrons to generate O_2^- on the photocatalyst surface."

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
