## Correction: Solution based rapid synthesis of AgCuO<sub>2</sub> at room temperature

 Nagarajan Padmavathy,<sup>a</sup> Rajagopalan Vijayaraghavan<sup>\*a</sup> and Giridhar U. Kulkarni<sup>b</sup>

 Correction for 'Solution based rapid synthesis of AgCuO<sub>2</sub> at room temperature' by Nagarajan Padmavathy *et al.*, *RSC Adv.*, 2014, 4, 62746–62750.

The authors regret that errors were made in the interpretation of XPS results (Fig. 7 in the original article) and in the conclusions of the original article.

The sentence beginning "Cu 2p<sub>3/2</sub> spectrum (Fig. 7c)..." in the **Results and Discussion** section of the original article should be replaced with the following: "Cu 2p<sub>3/2</sub> spectrum (Fig. 7c) shows a peak at 933.8 eV and a shoulder at 934.7 eV, indicating the presence of Cu<sup>2+</sup> and Cu<sup>3+</sup> respectively. However, the assignment of Cu<sup>3+</sup> is not certain, as the XPS signal of Cu<sup>3+</sup> could be ambiguous".

Furthermore, the sentence beginning "The present study has significance..." in the **Conclusions** section of the original article should be replaced with the following: "The present study has significance as AgCuO<sub>2</sub> is an interesting material with low band gap and more importantly, with Cu *partly* in the unusual 3+ state".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
