Correction: 3-Hydroxypropionaldehyde (3-HPA) quantification by HPLC using a synthetic acrolein-free 3-hydroxypropionaldehyde system as analytical standard

G. Burgé, A. L. Flourat, B. Pollet, H. E. Spinnler and F. Allais

Correction for ‘3-Hydroxypropionaldehyde (3-HPA) quantification by HPLC using a synthetic acrolein-free 3-hydroxypropionaldehyde system as analytical standard’ by G. Burgé et al., RSC Adv., 2015, 5, 92619–92627.

The authors regret that the image provided for Fig. 7 in the original article does not match the caption provided. The figure is presented below with an amended image.

Fig. 7 Analysis of 3-HPA by HPLC (distilled water supplemented with 4 g L\(^{-1}\) of synthetic 3-HPA system). Chromatogram obtained by (Top) Refractive Index detection and (Bottom) UV detection at 210 nm. Citric acid solution (C = 5 mM) was used as internal standard and added at 50% (v/v) to the sample before HPLC analysis.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
