Correction for 'One-shot carboxylation of microcrystalline cellulose in the presence of nitroxyl radicals and sodium periodate' by Sergiu Coseri *et al.*, *RSC Adv.*, 2015, **5**, 85889–85897.

The authors regret that the images presented for Fig. 1 and 3 in the original article present incorrect carbohydrate structures. The amended versions of these images, in which the 3-position hydroxyl groups are equatorial rather than axial, are presented below.

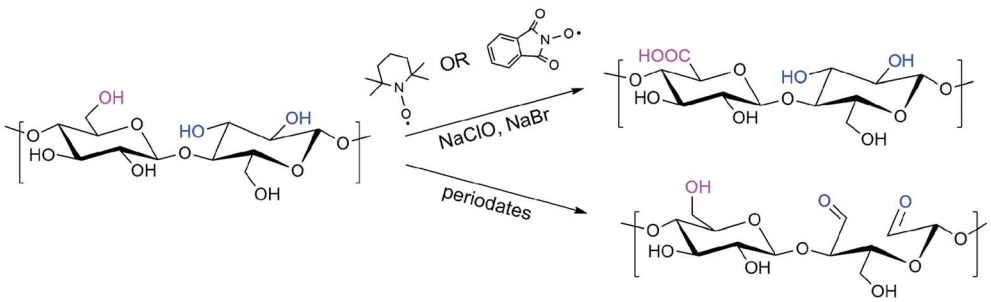

Fig. 1 Possible oxidation routes for cellulose selective oxidation, in the presence of nitroxyl radicals or periodates.

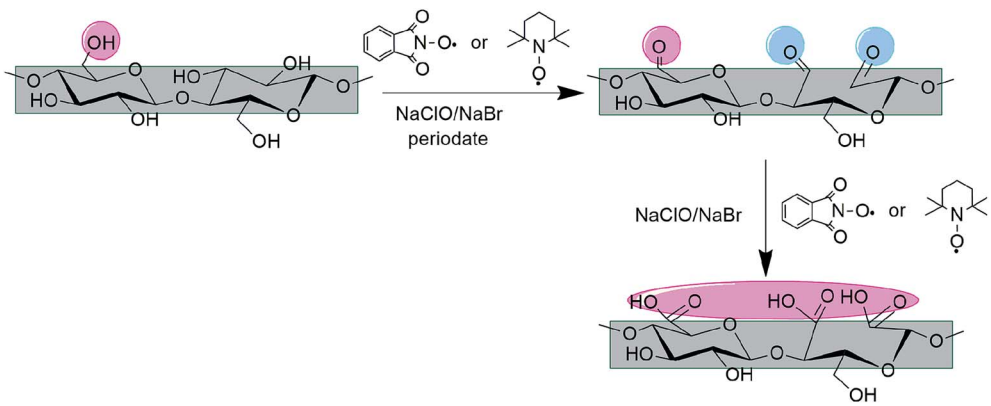

Fig. 3 Illustration scheme of the full oxidation of cellulose in the presence of both nitroxyl radical (TEMPO or PINO) and periodate.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
