Correction: Three-dimensional multilevel porous thin graphite nanosuperstructures for Ni(OH)_2 -based energy storage devices

Jing Ning,^{ac} Xiaobin Xu,^a Chao Liu^a and D. L. Fan^{*ab}

Correction for 'Three-dimensional multilevel porous thin graphite nanosuperstructures for Ni(OH)_2 -based energy storage devices' by Jing Ning *et al.*, *J. Mater. Chem. A*, 2014, 2, 15768–15773.

There was an error in the paragraph beginning "Next, employing such a 3-D porous Cu–Ni template, ..." on page 15769. The corrected sentence is copied below;

"Then the reaction temperature was increased to 600 °C in the presence of Ar–H₂ before ethylene (C₂H₄, the source of carbon) was introduced at 20 sccm for **24 hours** to grow graphite on the Cu–Ni catalysts."

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
