## Correction: Low-cost and high energy density asymmetric supercapacitors based on polyaniline nanotubes and MoO<sub>3</sub> nanobelts

Hui Peng,<sup>a</sup> Guofu Ma,<sup>\*a</sup> Jingjing Mu,<sup>a</sup> Kanjun Sun<sup>b</sup> and Ziqiang Lei<sup>\*a</sup>

Correction for 'Low-cost and high energy density asymmetric supercapacitors based on polyaniline nanotubes and MoO<sub>3</sub> nanobelts' by Hui Peng *et al.*, *J. Mater. Chem. A*, 2014, **2**, 10384–10388.

The following sentence on page 10387 is incorrect: "According to the formula of specific capacitance ( $ESI^\dagger$ ), the gravimetric capacitance of PANI//MoO<sub>3</sub> ASCs is as high as 518 F g<sup>-1</sup> at a current density of 0.5 A g<sup>-1</sup>, which is much higher than those recently reported for other ASCs, such as RGO–RuO<sub>2</sub>//RGO–PANI (about 360 F g<sup>-1</sup> at 0.3 A g<sup>-1</sup>),<sup>13</sup> GrMnO<sub>2</sub>//GrMoO<sub>3</sub> (307 F g<sup>-1</sup> at 0.2 A g<sup>-1</sup>)<sup>14</sup> and Ni(OH)<sub>2</sub>/UGF//a-MEGO (119 F g<sup>-1</sup> at 1 A g<sup>-1</sup>).<sup>32</sup>".

This should read "According to the formula of specific capacitance ( $ESI^\dagger$ ), the gravimetric capacitance of one electrode in the PANI//MoO<sub>3</sub> ASCs is as high as 518 F g<sup>-1</sup> at a current density of 0.5 A g<sup>-1</sup>, which is much higher than those recently reported for other ASCs, such as RGO–RuO<sub>2</sub>//RGO–PANI (about 360 F g<sup>-1</sup> at 0.3 A g<sup>-1</sup>),<sup>13</sup> GrMnO<sub>2</sub>//GrMoO<sub>3</sub> (307 F g<sup>-1</sup> at 0.2 A g<sup>-1</sup>)<sup>14</sup> and Ni(OH)<sub>2</sub>/UGF//a-MEGO (119 F g<sup>-1</sup> at 1 A g<sup>-1</sup>).<sup>32</sup>".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
