Correction: Melamine in breast milk

Begum Yurdakok,* Ayhan Filazi, Husamettin Ekici, Tolga Hasan Celik and Ufuk Tansel Sireli

The authors apologise that in the following places the unit ng L$^{-1}$ should be μg L$^{-1}$:

- p. 242, abstract, line 5: 10.69 and 76.43 μg L$^{-1}$
- p. 244, column 1, paragraph 1: 10.62 and 41.55 μg L$^{-1}$
- p. 244, column 2, paragraph 2: 10.62 μg L$^{-1}$ and 76.43 μg L$^{-1}$, and only three (3.9%) were found to be higher than the LOQ values, 42.43 μg L$^{-1}$, 52.83 μg L$^{-1}$ and 76.43 μg L$^{-1}$
- p. 244, column 2, paragraph 4: (76.43 μg L$^{-1}$)

The authors would also like to correct the total melamine concentration range as listed in Table 3 from 10.09–76.43, to 10.69–76.43.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
