Correction for 'One-pot atom-efficient synthesis of bio-renewable polyesters and cyclic carbonates through tandem catalysis' by Fan Jia *et al.*, *Chem. Commun.*, 2015, **51**, 8504–8507.

The authors regret their oversight in not giving due prominence to the work reported by C. Thomas *et al.* (cited as ref. 14 of *Chem. Commun.*, 2015, **51**, 8504–8507). The authors therefore wish to add the following statement to the introduction section of their article:

“Very recently, Thomas and co-workers reported the first tandem catalytic system for the efficient synthesis of well-defined polypeptides and cyclic carbonates. This work indicated far-reaching prospects for tandem catalysis and further prompted us to explore the new tandem process for the polymerization of OCA monomers.¹⁴”

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
