Correction: Weak backbone CH· · · O—C and side chain tBu· · · tBu London interactions help promote helix folding of achiral NtBu peptoids

G. Angelici, ab N. Bhattacharjee, cd O. Roy, ab S. Faure, ab C. Didierjean, e L. Jouffret, ab F. Jolibois, c L. Perrin* d and C. Taillefumier* ab

Correction for ‘Weak backbone CH· · · O—C and side chain tBu· · · tBu London interactions help promote helix folding of achiral NtBu peptoids’ by G. Angelici et al., Chem. Commun., 2016, 52, 4573–4576.

The authors regret their oversight in not representing appropriately the findings from previous work by F. S. Nandel et al., cited as ref. 15 on page 4576 of the original article. The authors therefore wish to change the sentence “In contrast to the \(i/(i-1)\) contact reported previously,15 hydrogen bonds develop within the same residue and between CO(\(i\)) and tBu CH(\(i+1\)) in \(\{+\}\) to “In \(\{+\}\), hydrogen bonds develop within the same residue and, as previously reported in related systems,15 between CO(\(i\)) and tBu CH(\(i+1\)).”

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
