## Correction: Weak backbone CH···O=C and side chain tBu···tBu London interactions help promote helix folding of achiral NtBu peptoids

G. Angelici,<sup>a,b</sup> N. Bhattacharjee,<sup>c,d</sup> O. Roy,<sup>a,b</sup> S. Faure,<sup>a,b</sup> C. Didierjean,<sup>e</sup> L. Jouffret,<sup>a,b</sup> F. Jolibois,<sup>c</sup> L. Perrin<sup>\*d</sup> and C. Taillefumier<sup>\*ab</sup>Correction for 'Weak backbone CH···O=C and side chain tBu···tBu London interactions help promote helix folding of achiral NtBu peptoids' by G. Angelici et al., *Chem. Commun.*, 2016, **52**, 4573–4576.

The authors regret their oversight in not representing appropriately the findings from previous work by F. S. Nandel *et al.*, cited as ref. 15 on page 4576 of the original article. The authors therefore wish to change the sentence ‘In contrast to the  $i/(i - 1)$  contact reported previously,<sup>15</sup> hydrogen bonds develop within the same residue and between CO( $i$ ) and tBu CH( $i + 1$ ) in (+)<sub>8</sub>.’ to ‘In (+)<sub>8</sub>, hydrogen bonds develop within the same residue and, as previously reported in related systems,<sup>15</sup> between CO( $i$ ) and tBu CH( $i + 1$ ).’

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
