Correction for 'Discovery of a ^{19}F MRI sensitive salinomycin derivative with high cytotoxicity towards cancer cells' by Qiuyan Shi *et al.*, *Chem. Commun.*, 2016, **52**, 5136–5139.

In the original manuscript, the data associated with the MTT assay of salinomycin analogs **5a–z**, salinomycin **1** and azide **4** with 4T1 cells constitute IC_{50} values rather than EC_{50} values. Therefore, all instances of ' EC_{50} ' in Table 1 and the corresponding discussion should be corrected to ' IC_{50} '. Further information about the MTT assay has also been added to the ESI.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
