## Correction: Determination of Kamlet-Taft parameters for selected solvate ionic liquids

Daniel J. Eyckens, ab Baris Demir, Tiffany R. Walsh, Tom Welton and Luke C. Henderson\*ab

DOI: 10.1039/c6cp90177h

Correction for 'Determination of Kamlet-Taft parameters for selected solvate ionic liquids' by Daniel J. Eyckens et al., Phys. Chem. Chem. Phys., 2016, 18, 13153-13157.

www.rsc.org/pccp

The authors would like to make the following corrections to their article:

- (a) In the abstract and conclusion,  $\beta$  values for the **G3TFSI** and **G4TFSI** should be amended to  $\beta$  = 0.31 and  $\beta$  = 0.28, respectively.
- (b) In Table 1, the  $\beta$  values and footnote 'b' should be amended as shown below:

Table 1 Polarity  $(E_{\rm T}^{\rm N})$  and Kamlet-Taft paramters for G3TFSI, G4TFSI, G3, G4, and [bmim]TFSI

Solvent	$E_{ m T}^{ m N}$	$lpha^a$	$eta^b$	π*
G3TFSI	1.03	1.32	0.31	0.94
G4TFSI	1.03	1.35	0.28	0.90
G3 Glyme	0.30	0.01	0.71	0.65
G4 Glyme	0.28	0.05	0.72	0.67
[bmim][TFSI]	0.59	0.59	0.22	0.96
$[bmim][TFSI]^c$	0.55	0.61	0.24	0.98

<sup>&</sup>lt;sup>a</sup> Normalised against methanol. <sup>b</sup> Normalised against HMPA. <sup>c</sup> Previously published polarity and Kamlet-Taft values for this IL, ref. 26 and 31.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
