Further correction: Low bandgap semiconducting polymers for polymeric photovoltaics

Chang Liu,* Kai Wang,* Xiong Gong** and Alan J. Heeger**

To provide additional figure permission information to the published correction (‘Correction: Low bandgap semiconducting polymers for polymeric photovoltaics’ by Chang Liu et al., Chem. Soc. Rev., 2016, DOI: 10.1039/C5CS90128F), the authors hereby provide the corrected caption for Fig. 3 below.

Fig. 3  Structural factors affect the bandgap of polyaromatic systems, where $E_{\text{BLA}}$ is the energy changed by increasing or decreasing the bond length alternation, $E_{\text{sub}}$ is the electron changed by introducing electron donating or withdrawing units, $E_{\text{res}}$ is the energy needed to transform from the aromatic structure to the quinoid structure, $E_{\theta}$ is the energy from the rotational disorder around the inter-annular sing bonds and $E_{\text{int}}$ is the energy from the intermolecular interactions. (Adapted with permission from J. Roncali, Chem. Rev., 1997, 97, 173–206, Copyright 1997 American Chemical Society.)

Furthermore, the authors regret their oversight in not attributing credit to the above prior work with regard to the analysis of structural factors in the original paper.
