Correction for 'Assembly of BF_4^-, PF_6^-, ClO_4^- and F^- with trinuclear copper(I) acetylide complexes bearing amide groups: structural diversity, photophysics and anion binding properties' by Hua-Yun Shi *et al.*, *RSC Adv.*, 2015, **5**, 89669–89681.

The authors regret that ref. 71 and 72 of the original article are not relevant to the corresponding discussion and should be replaced with a single reference, herein cited as ref. 1. The authors use SQUEEZE in the PLATON package to investigate the heavily disordered counter anions and solvent molecules of trinuclear copper(I) acetylide complexes.[1] They do not use the TOPOS program reported in ref. 71 and 72, which is instead used to analyse topology.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
