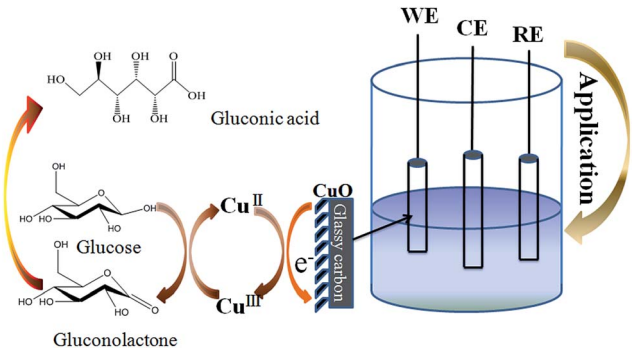
Correction for 'Phase transformation-controlled synthesis of CuO nanostructures and their application as an improved material in a carbon-based modified electrode' by Zhonghua Xue *et al.*, *RSC Adv.*, 2016, **6**, 12829–12836.

The authors regret that in the original article the structures of glucose and gluconolactone in Scheme 2 are incorrect. A corrected version of Scheme 2, in which the orientations of a number of the hydroxyl groups have been corrected, is presented herein.



Scheme 2 The schematic representation of the mechanism of the glucose oxidation based on CuO/GCE.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
