Correction for 'Interlayer interaction and related properties of bilayer hexagonal boron nitride: *ab initio* study' by Alexander V. Lebedev *et al.*, *RSC Adv.*, 2016, **6**, 6423–6435.

The authors regret that in the original article the graph presented in Fig. 5, which shows the dependence of the formation energy  $U_D$  of dislocation on the angle  $\beta$ , contains some errors. A corrected version of Fig. 5, in which the numerical values on the *y*-axis have been revised, is presented herein.

Fig. 5 Calculated formation energy of dislocations  $U_D$  per unit width (in eV Å $^{-1}$ ) as a function of angle  $\beta$  (in degrees) between the Burgers vector  $\vec{b}$  and normal  $\vec{n}$  to the boundary between commensurate domains for a full dislocation (solid black line) in h-BN layers aligned in the opposite directions and a partial dislocation (dashed red line) in h-BN layers aligned in the same direction.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
