[www.rsc.org/advances](http://www.rsc.org/advances)Correction for 'Influence of silk–silica fusion protein design on silica condensation *in vitro* and cellular calcification' by Robyn Plowright et al., *RSC Adv.*, 2016, 6, 21776–21788.

A corrected version of Fig. 6 is provided below:

**Fig. 6** SEM images of human mesenchymal stem cells grown on recombinant silk and silk–silica films. hMSC were grown on pre-silicified recombinant nh-15mer, nh-15mer-R5, 15mer-ch and R5-15mer-ch films. Osteogenesis was induced and cells were imaged 8 weeks post-seeding. Scale bars are 10 mm.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
