Correction for 'Substituent interference on supramolecular assembly in urea gelators: synthesis, structure prediction and NMR' by Francesca Piana *et al.*, *Soft Matter*, 2016, **12**, 4034–4043.

After the publication of our paper we have become aware of the work of Nonappa, Lahtinen, Kolehmainen *et al.* reporting CP/MAS NMR spectra of gels. Hence, the sentence referring to CP/MAS NMR results should read "These are rare examples of supramolecular gels in which <sup>1</sup>H–<sup>13</sup>C CP/MAS NMR peaks were detectable without any physical modification of the gel samples."<sup>1–3</sup>
