Correction for 'Epitope imprinting enhanced IMAC (EI-IMAC) for highly selective purification of His-tagged protein' by Senwu Li et al., J. Mater. Chem. B, 2016, 4, 1960-1967.

The authors wish it to be noted that an error in calculation resulted in incorrect  $K_a$  values being quoted in Table 3 and the second paragraph of page 6 of the above article. The correct  $K_a$  values for EI-IMAC-H and EI-IMAC-L are 2.384 and 0.054, and the correct unit for  $K_a$  is (×10<sup>6</sup> M<sup>-1</sup>). In addition,  $K_d$  in the footnote of Table 3 should be  $K_a$ .

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
