A minor labelling error was present in Fig. 3(b) of the published article; the correct version of this part of the figure is shown below.

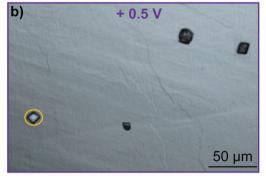

Fig. 3 Images of CaCO<sub>3</sub> growth at biased HOPG surfaces after 5 h in 5 mM CaCl<sub>2</sub> and 20 mM NaHCO<sub>3</sub> (initial pH = 8.07). (b) Optical image of calcite crystal growth (yellow highlight) for an applied potential of +0.50 V vs. SCE at the HOPG working electrode.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
