Correction: Ultrafast photochemistry of the bc_1 complex

Marten H. Vos,^{*a} Brandon J. Reeder,^b Fevzi Daldal^c and Ursula Liebl^a

Correction for 'Ultrafast photochemistry of the bc_1 complex' by Marten H. Vos *et al.*, *Phys. Chem. Chem. Phys.*, 2017, **19**, 6807–6813.

In the originally published version of our paper, the colors in the legend box of Fig. 1B were erroneously inverted. The correct version of Fig. 1 is represented below.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.

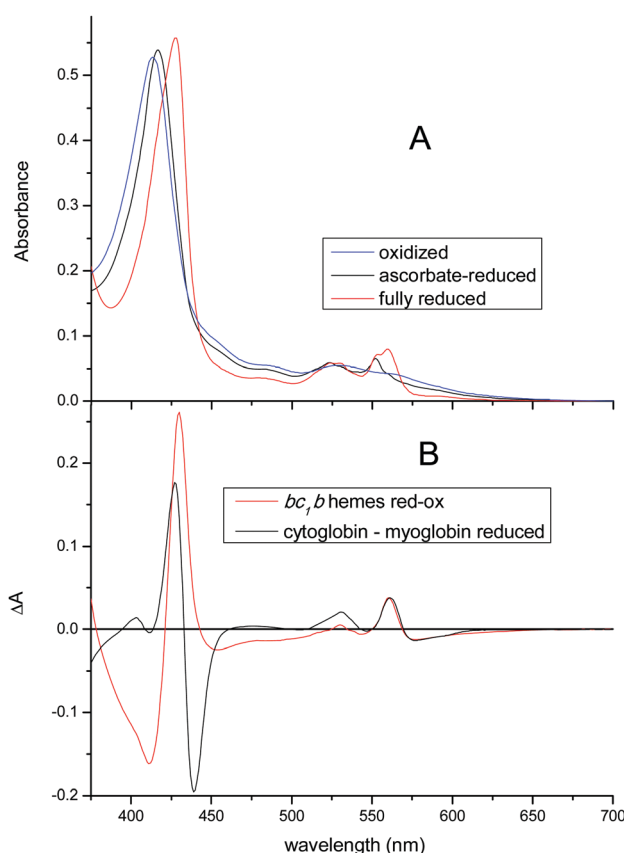

Fig. 1 (A) Absorption spectra of the fully oxidized, ascorbate reduced and fully reduced form of bc_1 . (B) Difference spectra of the fully-reduced and ascorbate-reduced forms, corresponding to the reduction of the b hemes. Also shown is the 6-coordinate-minus 5-coordinate spectrum of b -hemes obtained from subtraction of the spectra of ferrous cytoglobin and ferrous myoglobin. The spectra are normalized at the 560 nm peak.
