Retraction: The feasibility of char and bio-oil production from pyrolysis of pit latrine sludge

Tom Bond,^{*a} Queenie Tse,^b Clementine L. Chambon,^c Paul Fennell,^c Geoff D. Fowler^b and Michael R. Templeton^b

Retraction of 'The feasibility of char and bio-oil production from pyrolysis of pit latrine sludge' by Tom Bond *et al.*, *Environ. Sci.: Water Res. Technol.*, 2017, DOI: 10.1039/c7ew00132k.

We, the named authors, hereby wholly retract this *Environmental Science: Water Research & Technology* article.

After publication we found a mistake in the energy balance calculations, which originated from an honest error made during preparation of the paper. In particular, Fig. 1 and 2 and associated parts of the results were affected. It also impacted the conclusion relating to net energy recovery at a range of sludge water content values.

The authors would like to apologise for any inconvenience to readers.

Signed: Tom Bond, Queenie Tse, Clementine L. Chambon, Paul Fennell, Geoff D. Fowler and Michael R. Templeton, 1st September 2017.

Retraction endorsed by Sam Keltie, Executive Editor, *Environmental Science: Water Research & Technology*.
