Expression of concern: Organocatalytic stereoselective synthesis of passifloricin A

Richard Kelly 

Expression of concern for 'Organocatalytic stereoselective synthesis of passifloricin A' by Pradeep Kumar *et al.*, *Org. Biomol. Chem.*, 2012, **10**, 1820–1825.

The following article 'Organocatalytic stereoselective synthesis of passifloricin A' by Pradeep Kumar, Menaka Pandey, Priti Gupta and Dilip D. Dhavale has been published in *Organic & Biomolecular Chemistry*.

It has been brought to the Executive Editor's attention that there are a number of unexplained discrepancies (visible under magnification) in the NMR spectra presented in the ESI accompanying this article. These have been confirmed by independent review by a member of the Editorial Board.

The affected spectra are: ^{13}C NMR for; **10**, **11**, **19**, **20**, **21** and **22**, ^1H NMR for; **13**, **19**, **20**, **21**, **22** and **1**.

Following consultation with the authors and the Director of CSIR-National Chemical Laboratory, we have established that archive copies of the original data supporting these spectra are no longer available for comparison. After carrying out an internal review the Director of CSIR-National Chemical Laboratory has determined that there was no intentional altering of the published NMR spectra.

However as the accuracy of these NMR spectra cannot be confirmed the Executive Editor is issuing this notice for readers' information.

Richard Kelly
