Correction for 'Engineering-scale superlubricity of the fingerprint-like carbon films based on high power pulsed plasma enhanced chemical vapor deposition' by Zhenbin Gong *et al.*, *RSC Adv.*, 2016, **6**, 115092–115100.

An incorrect version of Fig. 3 was published; the corrected version is shown below:

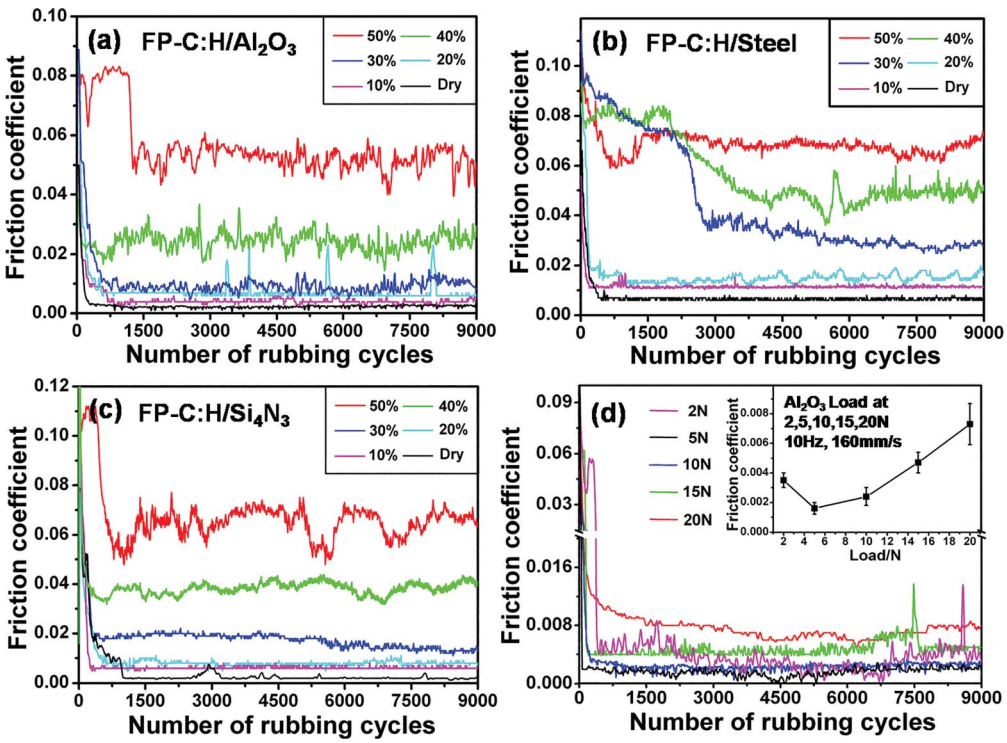

Fig. 3 (a–c) The friction coefficient curves as a function of rubbing cycles at different humidity against Al_2O_3, Si_4N_3, and steel ball, respectively. (d) Friction coefficient curves of the FP-C:H films in a dry air atmosphere under a load from 2 N to 20 N, the inset shows the friction coefficient as a function of load.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
