Correction: Wheel-shaped copper containing polyoxotungstate as an efficient catalyst in the three-component synthesis of 1,2,3-triazoles

Fariba Jalilian, Bahram Yadollahi,* Shahram Tangestaninejad and Hadi Amiri Rudbari

Correction for 'Wheel-shaped copper containing polyoxotungstate as an efficient catalyst in the three-component synthesis of 1,2,3-triazoles' by F. Jalilian *et al.*, *RSC Adv.*, 2016, 6, 13609–13613.

The authors wish to add ref. 1 to their article to provide a more comprehensive summary of the prior work in the field as follows:

"The Cu₂₀ POM cluster is the smallest type of macro-ion showing unique blackberry self-assembly behavior."¹

In addition, the authors regret their oversight in not properly attributing the reproduced image in Scheme 1 to ref. 24 in this *RSC Advances* article. The scheme with the updated caption is shown below.

Scheme 1 One-pot synthesis of 1,2,3-triazoles in the presence of Cu₂₀ POM. Image of Cu₂₀POM reproduced from ref. 24 with retrospective permission from Wiley-VCH Verlag GmbH & Co. KGaA, 2016.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
