Correction for 'A novel, rapid and green method of phosphorylation under ultrasound irradiation and catalyst free conditions' by Abdeslem Bouzina *et al.*, *RSC Adv.*, 2015, **5**, 46272–46275.

The authors wish to update this *RSC Advances* article to notify readers that the following NMR spectra have been reproduced from prior reports published by their research group:

The ^{1}H-NMR, ^{13}C-NMR and ^{31}P-NMR spectra shown in the ESI for (*S*)-methyl-2-(2-(diethoxyphosphoryl)acetamido)-4-methylpentanoate and (*S*)-diethyl-(2-((1-hydroxy-4-methylpentan-2-yl)amino)-2-oxoethyl)phosphonate have been reproduced from ref. 1.

The ^{1}H-NMR spectra for *N*-phenyl-(1-(2-dimethoxyphosphoryl)acetamide)sulfamide, *N*-3-fluorophenyl-(1-(2-dimethoxyphosphoryl)acetamide)sulfamide and *N*-4-methoxyphenyl-(1-(2-dimethoxyphosphoryl)acetamide)sulfamide have been reproduced from ref. 2.

These spectra were reproduced in this *RSC Advances* article for information purposes only. The product identities for the particular reactions reported in this *RSC Advances* article were confirmed by thin layer chromatography (TLC) and melting point analysis.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
