Correction for 'Electrochemical promotion of catalysis over Pd nanoparticles for CO<sub>2</sub> reduction' by Fan Cai et al., Chem. Sci., 2017, DOI: 10.1039/c6sc04966d.

Two minor mistakes were present in the published article and should be corrected as follows:

Page 2, eqn (2): in the denominator "total amount of Pd in electrode (in milligram)" should be revised to "total amount of Pd in electrode (in gram)".

 $r = \frac{\text{total amount of formate generated in one hour (in mol)}}{\text{total amount of Pd in electrode (in gram)} \times 1 \text{ h}}$ 

Page 3, column 2, paragraph 2, line 9: "...about 1.9  $\operatorname{mol}_{\operatorname{formate}} \operatorname{mg}_{\operatorname{Pd}}^{-1} \operatorname{h}^{-1}$ ..." should be revised to "...about 1.9  $\operatorname{mol}_{\operatorname{formate}} \operatorname{g}_{\operatorname{Pd}}^{-1} \operatorname{h}^{-1}$ ...".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
